2001 SUMMARY ANALYSIS

The population figures used in this book are estimates based on data received from the Governor's Office of Planning and Budget. In the Crime in Utah editions prior to 1993, BCI used population estimates provided by the FBI. As a result, crime rates published in this report will not be identical to the Utah crime rates used in the FBI publications. BCI uses the Planning and Budget Office figures because they are comparable to the FBI estimates and are available earlier in the year, allowing a more timely publication of this report.

- In 2001, a total of 94,180 index crimes were committed which indicates a 0.39% increase in the overall crime rate from 2000*.
- The violent crime rate decreased 4.26% from the previous year, with increases in the homicide rate (59.79%), and the rape rate (1.33%). The robbery rate decreased 2.57%, and the aggravated assault rate decreased 7.15%.
- Firearms were used in 55.07% of the homicides reported.
- 31.88% of the homicides reported were domestic homicides, 53.62% were not domestic, and in 14.49% the relationship was unknown.
- The property crime rate increased 0.68%.
- The burglary rate decreased 1.04%.
- The larceny rate increased 0.57%.
- The value of property stolen amounted to \$101,142,866. Of that amount, \$39,336,715 was recovered, indicating a 38.9% recovery rate.
- Residential burglaries accounted for 59.9% of all burglaries. Of all residential burglaries, 49.0% were committed during daytime hours (6:00 am to 6:00 pm).
- Reported hate crimes decreased from 80 in 2000 to 68 in 2001, a 15% decrease. Of these 68 hate crimes, 6 were Anti-Islamic hate crimes that were committed after September 11, 2001.

*In 2000, one of the larger agencies only submitted seven months worth of data. Because of these missing months, the crime statistics shown for 2000 are lower than what they would have normally been. It is estimated, based upon their seven submitted months, that if they had submitted a full twelve months of data in 2000 that the statewide crime totals for 2000 would be higher than the crime totals shown for 2001. (This does not effect the homicide or arson totals.)

The following agencies did not participate in 2001. Their combined populations represent 0.85% of the state's population.

CRIME FACTORS

In order to produce a meaningful statistical profile of crime within the State of Utah, each law enforcement agency is asked to participate in the Uniform Crime Reporting program (UCR), reporting data on crimes that became known to law enforcement within their jurisdiction. Utah uses the same offense classifications used in the national UCR program so that the resulting crime statistics are comparable to those compiled across the nation.

In the UCR program, crimes are divided into two categories: Part I Crimes (or "Index Crimes"), which include homicide and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny, motor vehicle theft, and arson; and Part II crimes, which include all other non-traffic offenses. If more than one Part I offense is committed in the same criminal episode, only the most serious offense is reported. Only arrest data is collected on the Part II crimes.

Crime rates in this publication are based on the stable population of the municipality. Although transient populations definitely impact the volume and nature of crime, it is impractical to base crime rate calculations on these fluctuating populations. Therefore, a municipality with high transient populations may have a higher crime rate than another municipality of similar size.

Characteristics of the community influence criminal activity and should be considered when attempting to interpret crime statistics presented herein. Twelve Utah law enforcement agencies did not report crime statistics to the state; these agencies are listed on page 2.

Below are some factors which will affect the type and volume of crime that occurs and is subsequently reported in a given location.

- Density and size of the population of the community and of the surrounding area.
- Relative stability of the population, including seasonal, commuter, and other transient populations.
- Composition of the population, particularly with reference to age, sex, and socioeconomic status.
- Economic status, including job availability and mores of the population.
- Climate, including seasonal weather conditions.
- Cultural conditions such as educational levels, recreational opportunities, and religious characteristics.
- Effective strength of law enforcement, including cooperation of neighboring agencies, reservations and federal law.
- Administrative and investigative emphasis and efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Attitudes of the public toward law enforcement and their crime reporting practices.

This report reflects crime in Utah as far as it is completely and accurately reported by local law enforcement agencies to the Utah Bureau of Criminal Identification.

CRIME CLOCK

On the average, one **INDEX CRIME** is reported every **5.58** minutes in the State of Utah.

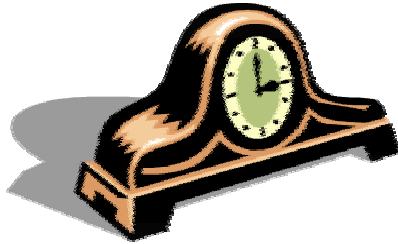

One **homicide** every
5.29 days

One **rape** every
10.03 hours

One **robbery** every
7.35 hours

One **aggravated assault**
every 2.83 hours

One **burglary** every
40.7 minutes

One **larceny** every
7.55 minutes

One **motor vehicle theft**
every 1.44 hours

One **arson**
every day

The Crime Clock should be viewed with care. Being an aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency in occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

CRIME CYCLE

Average number of crimes reported in a 24 hour period in Utah

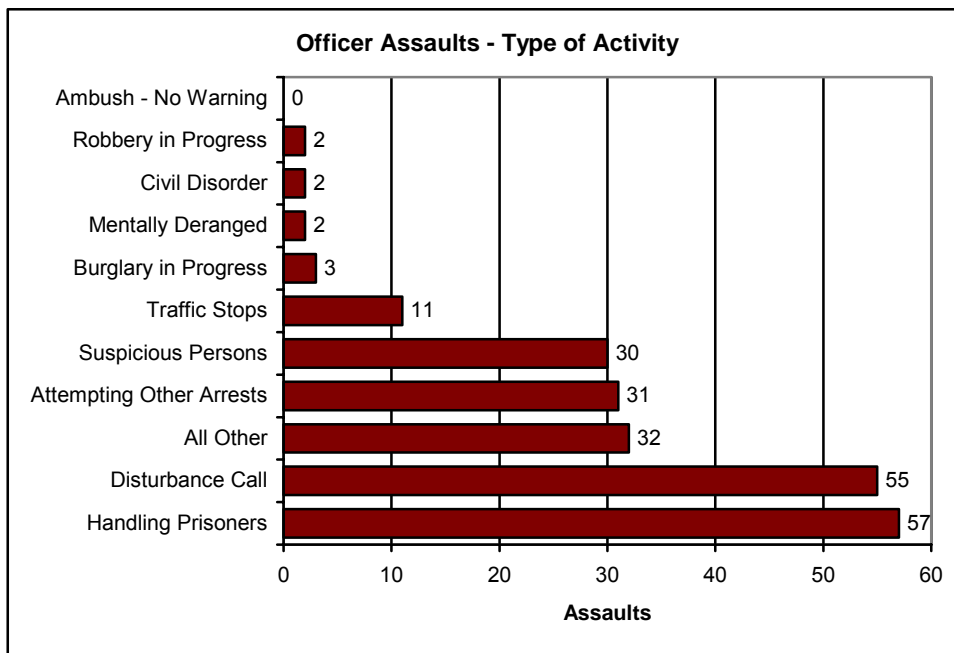

The Crime Cycle should be viewed with care. Being an aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency in occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

INCIDENT BASED REPORTING

INCIDENT BASED REPORTING

Growing numbers of Utah law enforcement agencies are participating in the Incident Based Reporting program (IBR), taking advantage of computer technology and the more detailed data base captured by an incident based system. As more agencies submit IBR data, it will become a powerful law enforcement tool, providing more detailed, meaningful, and timely information about criminal activities than has been available in the past. In 2001, 57.5% of the Utah population was accounted for by IBR submitting agencies.

Because IBR collects details about the offenses, victims, offenders, property, and arrests involved in each crime incident, it is possible to analyze various aspects of the crime which is occurring in our society, and provide law enforcement administrators, elected officials, and other planners and policy makers with the precise information they need.

The BCI staff recognizes the work and energy that goes into converting to a new reporting system, and we extend our gratitude to the following agencies who have realized the potential of IBR and have committed their resources to its success:

SALT LAKE AREA GANG PROJECT

Because the majority of gang crimes reported are in the Salt Lake County area, the figures on this page represent data from the Salt Lake Area Gang Project only, and do not reflect totals from the preceding pages. Jurisdictions included on this page are: Midvale PD, Murray PD, Salt Lake City PD, South Salt Lake PD, Salt Lake Co. S.O., Sandy PD, West Jordan PD, West Valley PD and the U. of U. PD

A change in the process of gathering graffiti totals in 2001 accounts for the dramatic increase in gang related crimes in 2001.

Prior to 2001, the data gathering for graffiti offenses was not reliable. Because of a change in reporting techniques, graffiti data for 2001 can not be accurately compared against past totals.

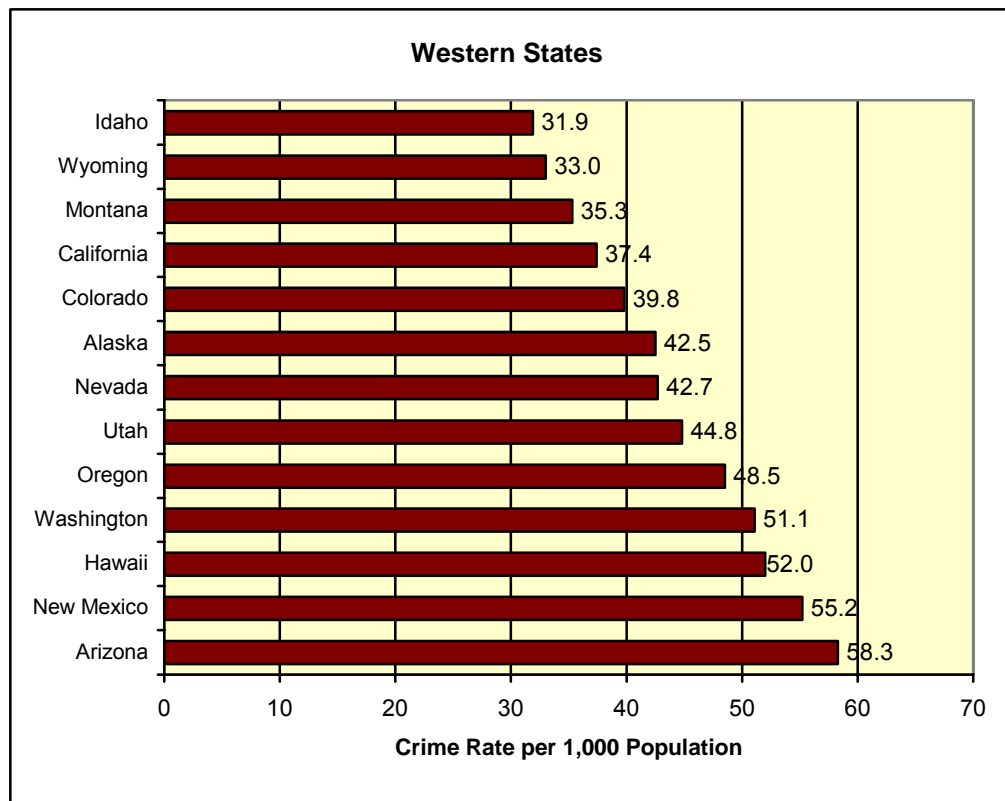

CRIME RATE COMPARISONS

Utah's crime rates compared to the nation's

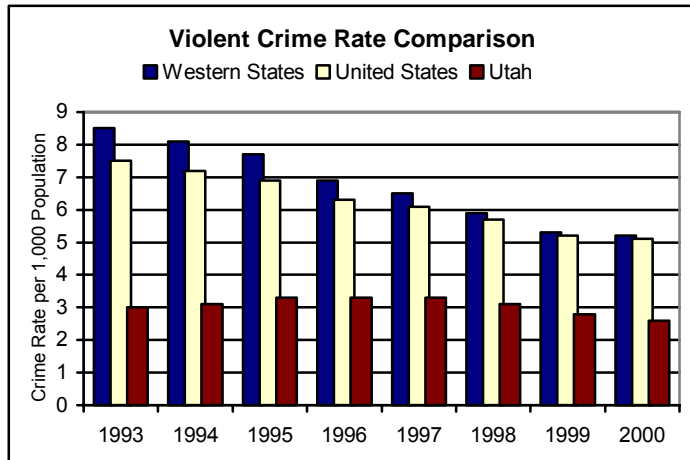

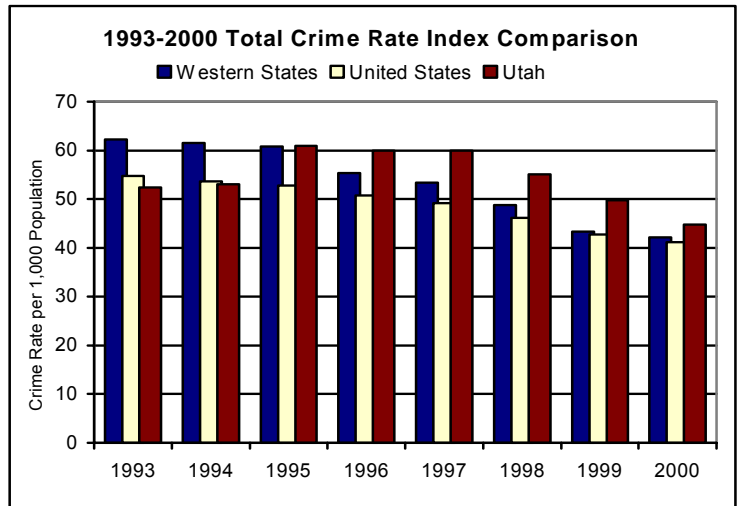

The charts on this page compare "Index Crime" rates. "Index Crimes" are the offenses of homicide, rape, robbery, aggravated assault, burglary, larceny/theft, motor vehicle theft, and arson. However, arson data is not available for this comparison, and is therefore not included in this page.

Source: *Crime in the U.S., 2000*

CRIME RATE COMPARISONS

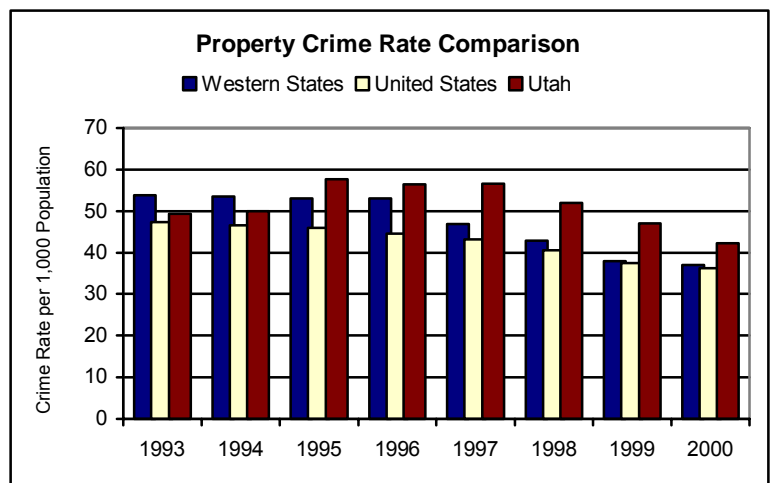

The FBI defines "Western States" as Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, and Wyoming - in addition to Utah
