## 2008 Summary Analysis

---

The population figures used in this book are estimates based on data received from the U.S. Census Bureau. In the *Crime in Utah* editions prior to 1993, BCI used population estimates provided by the FBI. As a result, crime rates published in this report will not be identical to the Utah crime rates used in the FBI publications. The U. S. Census Bureau's web site that gives the population figures and the methodology used is located here: <http://www.census.gov>.

- In 2008, a total of 96,555 index crimes were committed, which indicates a 2.07% decrease in the overall crime rate from 2007.
- The violent crime rate decreased 4.09% from the previous year; with decreases in the homicide rate (29.09%), rape (3.79%), robbery rate (1.87%), and the aggravated assault rate (4.64%).
- Firearms were used in 34.55% of the homicides reported.
- 21.57% of the homicides reported involved family relationships, 66.67% did not, and in 11.76% the victim/offender relationship was unknown.
- The property crime rate decreased 1.93%.
- The burglary rate decreased 7.86%.
- The larceny rate increased 1.37%.

The value of property stolen amounted to \$96,866,741. Of that amount, \$25,259,165 was recovered, indicating a 26.08% recovery rate.

- Residential burglaries accounted for 65.10% of all burglaries. Of all residential burglaries, 58.73% were known to be committed during daytime hours (6:00 am to 6:00 pm).
- Reported hate crimes decreased from 59 in 2007 to 44 in 2008, a 25.42% decrease.

# Crime Factors

---

In order to produce a meaningful statistical profile of crime within the State of Utah, each law enforcement agency is asked to participate in the Uniform Crime Reporting (UCR) program, reporting data on crimes that became known to law enforcement within their jurisdiction. Utah uses the same offense classifications used in the national UCR program so that the resulting crime statistics are comparable to those compiled across the nation.

In the UCR program, crimes are divided into two categories: Part I Crimes (or "Index Crimes"), which include homicide and non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny, motor vehicle theft, and arson; and Part II crimes, which include all other non-traffic offenses. If more than one Part I offense is committed in the same criminal episode, only the most serious offense is reported. Only arrest data is collected on the Part II crimes.

Crime rates in this publication are based on the stable population of the municipality. Although transient populations definitely impact the volume and nature of crime, it is impractical to base crime rate calculations on these fluctuating populations. Therefore, a municipality with high transient populations may have a higher crime rate than another municipality of similar size.

Characteristics of the community influence criminal activity and should be considered when attempting to interpret crime statistics presented herein. Twenty-three Utah law enforcement agencies did not report crime statistics to the state.

Below are some factors which will affect the type and volume of crime that occurs and is subsequently reported in a given location.

- Density and size of the population of the community and of the surrounding area.
- Relative stability of the population, including seasonal, commuter, and other transient populations.
- Composition of the population, particularly with reference to age, sex, and socioeconomic status.
- Economic status, including job availability and mores of the population.
- Climate, including seasonal weather conditions.
- Cultural conditions such as educational levels, recreational opportunities, and religious characteristics.
- Effective strength of law enforcement, including cooperation of neighboring agencies, reservations and federal law enforcement agencies.
- Administrative and investigative emphasis and efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Attitudes of the public toward law enforcement and their crime reporting practices.

**This report reflects crime in Utah as far as it is completely and accurately reported by local law enforcement agencies to the Utah Bureau of Criminal Identification.**

# Crime Clock

---

On the average, one **INDEX CRIME** is reported every **5.46 minutes** in the State of Utah.

One **homicide** every  
9.36 days

One **rape** every  
9.86 hours

One **robbery** every  
6.17 hours

One **aggravated assault**  
every 2.39 hours

One **burglary** every  
37.70 minutes

One **larceny** every  
7.54 minutes

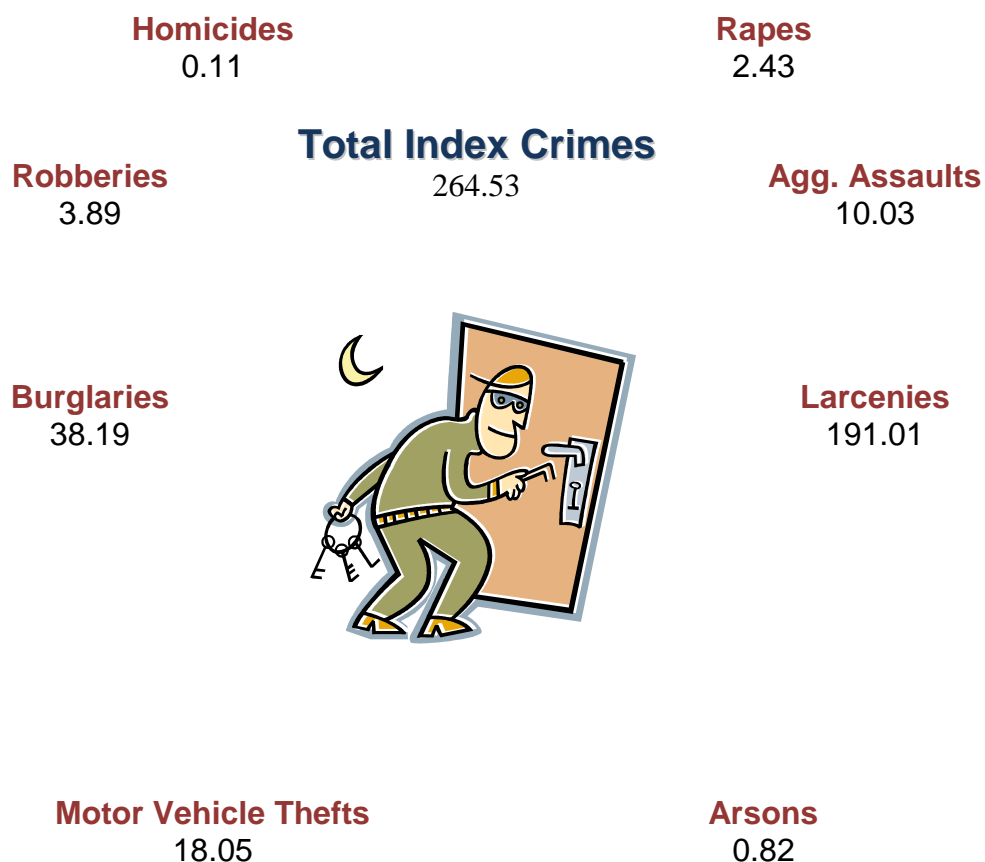

One **motor vehicle theft**  
every 1.33 hours

One **arson**  
every 1.22 days

The Crime Clock should be viewed with care. Being an aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency in occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

# Crime Cycle

Average number of index crimes reported in a 24 hour period in Utah

The Crime Cycle should be viewed with care. Being an aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency in occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

# Law Enforcement Employees Per Agency

---

Because of law enforcement's differing service requirements and functions as well as the varied demographic traits and characteristics of jurisdictions, use caution when drawing comparisons between agency staffing levels based upon police employment data from the Uniform Crime Reporting (UCR) Program. It must be remembered that the totals given for sworn officers for any particular agency reflect not only the patrol officers on the street but also officers assigned to various other duties such as those in administrative and investigative positions as well as those assigned to special teams.

## Data Collection:

- Each year, law enforcement agencies in Utah report the total number of sworn law enforcement officers and civilians in their agency as of October 31 to the UCR Program.
- The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from government funds set aside specifically for law enforcement.
- Civilian employees include personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics, provided that they are full-time employees of the agency.

## Overview:

- In 2008, sworn officers accounted for 61.12% of all law enforcement personnel in Utah.
- The rate of full-time law enforcement employees (civilian and sworn) per 1,000 inhabitants in Utah for 2008 was 2.84; the rate of sworn officers was 1.74 per 1,000. The UCR Program computes these rates by taking the number of employees, dividing by the population of agency's jurisdiction, and multiplying by 1,000.
- Female employees accounted for 49.93% of all full-time civilian law enforcement employees in 2008.
- Males accounted for 92.70% of all full-time sworn law enforcement officers in 2008.

§ Task force agencies are comprised of officers from various agencies within these counties.

£ Cottonwood Heights became operational September 1, 2008. Prior to this date the statistics were included with the Salt Lake County Sheriff's Office.

\* Gunnison PD submitted data, but due to computer problems the data was incorrect, therefore it is not included in this report.

¥ This agency did not submit statistical data, however, a homicide occurred in their jurisdiction.

≈ Utah Highway Patrol only collects data on arrests - see arrest data.

# Estimated Agency Crime Totals

If an agency submitted 3 or more months of data, but fewer than 12, the estimation is based on the reports that the agency did submit. The total number of crimes for each category (rape, robbery, etc.) is estimated by multiplying the reported number of crimes in that category by 12/N, where N is the number of months for which reports exist. This formula was not used for homicides, as BCI gathers homicide data from all agencies, regardless of whether or not they submit UCR data.

For agencies that submitted no data at all to BCI, estimated crime rates were based on agencies which are considered to be those in the same population group as the non-submitting agency, and which submitted a full 12 months of data. Thus, if all the fully-submitting agencies in the same population group averaged N number of rapes per 1,000 population, it was estimated that the non-submitting agency in the same population group also had N number of rapes per 1,000 population. The same process was repeated for robbery, aggravated assault, etc. It was not used for homicides, as BCI gathers homicide data from all agencies, regardless of whether or not they submit UCR data. Estimation was also not calculated on the arson data.

# Incident Based

Growing numbers of Utah law enforcement agencies are participating in the Incident Based Reporting program (IBR), taking advantage of computer technology and the more detailed data base captured by an incident based system. As more agencies submit IBR data, it will become a powerful law enforcement tool, providing more detailed, meaningful, and timely information about criminal activities than has been available in the past. In 2008, 76.15% of the Utah population was accounted for by IBR submitting agencies.

Because IBR collects details about the offenses, victims, offenders, property, and arrests involved in each crime incident, it is possible to analyze various aspects of the crime which is occurring in our society, and provide law enforcement administrators, elected officials, and other planners and policy makers with the precise information they need.

The BCI staff recognizes the work and energy that goes into converting to a new reporting system, and we extend our gratitude to the following agencies that have realized the potential of IBR and have committed their resources to its success:

**CLEARANCE** - incidents may be cleared by arrest or by exceptional means.

*Clearance by Arrest:* The FBI's Uniform Crime Reporting Program states that "an offense is cleared by arrest or solved for crime reporting purposes when at least one person is: 1) arrested, 2) charged with the commission of the offense; and then turned over to the court for prosecution (whether following arrest, court summons, or police notice). Although no physical arrest is made, a clearance when the offender is a person under 18 years of age and is cited to appear in juvenile court or before other juvenile authorities."

*Clearance by Exception:* The FBI's Uniform Crime Reporting Program states that "In certain situations, law enforcement is not able to follow the three outlined steps under 'clearance by arrest' to clear offenses known to them." However, "if the following questions can be answered 'yes,' the offense is considered to be 'Cleared by Exception.'"

1. Has the investigation definitely established the identity of the offender?
2. Is there enough information to support an arrest, charge, and turning over to the court for prosecution?
3. Is the exact location of the offender known so that the subject could be taken into custody now?
4. Is there some reason outside law enforcement control that precludes arresting, charging, and prosecuting the offender?

Some examples of exceptional clearance situations:

- Death of the offender (suicide, killed by law enforcement, murder-suicide situation, natural causes)
- Deathbed confession by offender
- Offender already in custody or serving sentence for another offense
- Extradition denied
- Victim refuses to cooperate in prosecution
