## 2009 Summary Analysis

---

The population figures used in this book are based on data received from the U.S. Census Bureau. The U.S. Census Bureau's web site for estimated population totals and the methodology used is located here:

<http://www.census.gov/popest/esttopics.html> .

- In 2009, a total of 96,762 index crimes were committed, which indicates a 0.21% increase in the overall crime rate from 2008.
- The violent crime rate decreased 1.46% from the previous year; with decreases in the robbery rate (7.47%) and the aggravated assault rate (0.57%). There were increases in the homicide rate (5.13%) and the rape rate (4.17%).
- Firearms were used in 63.41% of the homicides reported.
- 34.15% of the homicides reported involved family relationships, 52.22% did not, and in 14.63% the victim/offender relationship was unknown.
- The property crime rate increased 0.33%.
- The burglary rate increased 6.00%.
- The larceny rate decreased 0.34%.
- The value of property stolen amounted to \$90,841,785. Of that amount, \$20,440,939 was recovered, indicating a 22.50% recovery rate.
- Residential burglaries accounted for 66.41% of all burglaries. Of all residential burglaries, 44.83% were known to be committed during daytime hours (6:00 am to 6:00 pm).
- Reported hate crimes increased from 44 in 2008 to 55 in 2009, a 25% increase.
- There were 134,151 arrests reported in 2009. This is down 3.34% from 2008. Adult arrests decreased 0.98%. Juvenile arrests decreased 12.05%. This arrest data does not include the Utah Highway Patrol arrests. They are unable to break down the arrests by age group.

# Crime Factors

---

In order to produce a meaningful statistical profile of crime within the State of Utah, each law enforcement agency is asked to participate in the Uniform Crime Reporting (UCR) program, reporting data on crimes that became known to law enforcement within their jurisdiction. Utah uses the same offense classifications used in the national UCR program so that the resulting crime statistics are comparable to those compiled across the nation.

In the UCR program, crimes are divided into two categories: Part I Crimes (or "Index Crimes"), which include homicide and non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny, motor vehicle theft, and arson; and Part II crimes, which include all other non-traffic offenses. If more than one Part I offense is committed in the same criminal episode, only the most serious offense is reported. Only arrest data is collected on the Part II crimes.

Crime rates in this publication are based on the stable population of the municipality. Although transient populations definitely impact the volume and nature of crime, it is impractical to base crime rate calculations on these fluctuating populations. Therefore, a municipality with high transient populations may have a higher crime rate than another municipality of similar size.

Characteristics of the community influence criminal activity and should be considered when attempting to interpret crime statistics presented herein. Twenty-three Utah law enforcement agencies did not report crime statistics to the state.

Below are some factors which will affect the type and volume of crime that occurs and is subsequently reported in a given location.

- Density and size of the population of the community and of the surrounding area.
- Relative stability of the population, including seasonal, commuter, and other transient populations.
- Composition of the population, particularly with reference to age, sex, and socioeconomic status.
- Economic status, including job availability and mores of the population.
- Climate, including seasonal weather conditions.
- Cultural conditions such as educational levels, recreational opportunities, and religious characteristics.
- Effective strength of law enforcement, including cooperation of neighboring agencies, reservations and federal law enforcement agencies.
- Administrative and investigative emphasis and efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Attitudes of the public toward law enforcement and their crime reporting practices.

**This report reflects crime in Utah as far as it is completely and accurately reported by local law enforcement agencies to the Utah Bureau of Criminal Identification.**

# Crime Clock

---

On the average, one **INDEX CRIME** is reported every **5.43 minutes** in the State of Utah.

One **homicide** every  
8.90 days

One **rape** every  
9.47 hours

One **robbery** every  
6.67 hours

One **aggravated assault**  
every 2.41 hours

One **burglary** every  
35.57 minutes

One **larceny** every  
7.56 minutes

One **motor vehicle theft**  
every 1.40 hours

One **arson**  
every 1.09 days

The Crime Clock should be viewed with care. Being an aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency in occurrence of the Index Offenses. This mode of display should not be taken to imply regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

# Crime Cycle

---

## Average number of index crimes reported in a 24 hour period in Utah.

The Crime Cycle should be viewed with care. Being an aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency in occurrence of the Index Offenses. This mode of display should not be taken to imply regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

# Officers Assaulted

When reviewing the information on Law Enforcement Officers Killed and Assaulted in this publication the following needs to be considered:

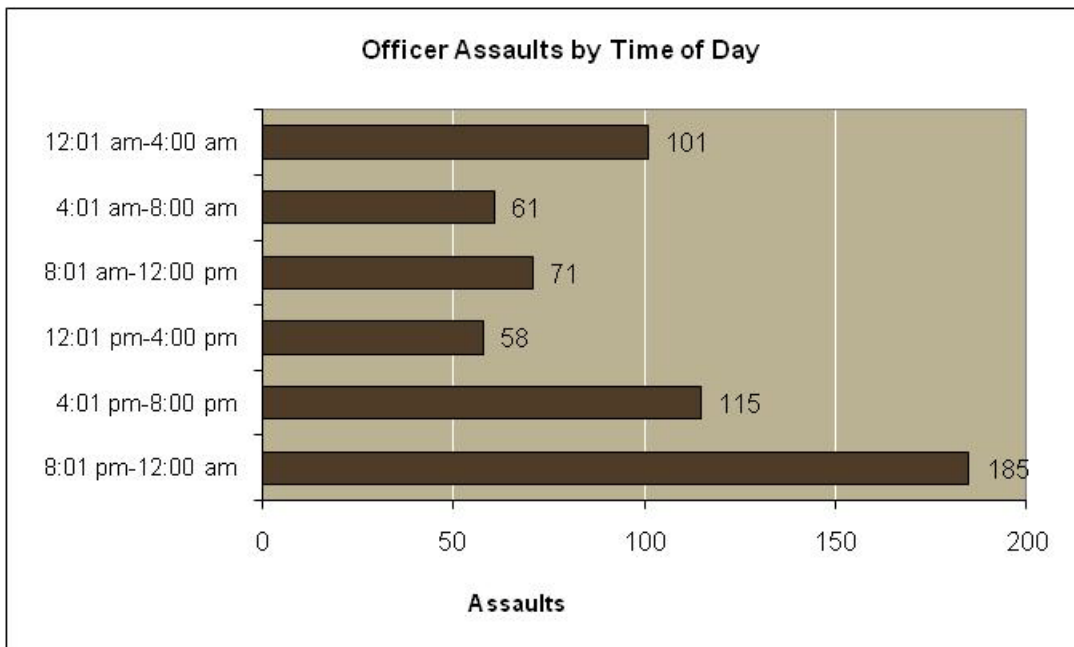

- The data in the tables and charts reflect the number of victim officers, not the number of incidents or weapons used.
- The UCR Program considers any part of the body that can be used as weapons (such as hands, fists, or feet) to be personal weapons and designates them as such in its data.

As of October 31, 2009 there were 4,761 law enforcement officers in Utah. Female officers made up 7.51% with male officers making up 92.49% of law enforcement officers employed in Utah.

# Law Enforcement Employees Per Agency

---

Because of law enforcement's differing service requirements and functions as well as the varied demographic traits and characteristics of jurisdictions, use caution when drawing comparisons between agency staffing levels based upon police employment data from the Uniform Crime Reporting (UCR) Program. It must be remembered that the totals given for sworn officers for any particular agency reflect not only the patrol officers on the street but also officers assigned to various other duties such as those in administrative and investigative positions as well as those assigned to special teams.

## Data Collection:

- Each year, law enforcement agencies in Utah report the total number of sworn law enforcement officers and civilians in their agency as of October 31 to the UCR Program.
- The UCR Program defines law enforcement officers as full-time, sworn personnel that possess full arrest powers, and carry a weapon. Their primary duties include responding to routine calls for police service, emergency situations, or crime scenes; performing routine patrol; rendering emergency services, enforcing criminal laws and traffic regulations; and investigating violations of criminal laws and traffic accidents. These employees' salaries are paid from law enforcement funds. In addition, correctional officers and police cadets should only be included in the officer counts if they are sworn and possess full arrest powers.
- Civilian counts are inclusive of all full-time employees of the agency, i.e., dispatchers, clerks, and meter attendants. These employees' salaries are paid from law enforcement funds. Furthermore, correctional officers or jailers that have no police or arrest powers outside the jail, should be counted as civilians as long as their salaries are paid from the funds of the law enforcement agency.

## Overview:

- In 2009, sworn officers accounted for 62.98% of all law enforcement personnel in Utah.
- The rate of full-time law enforcement employees (civilian and sworn) per 1,000 inhabitants in Utah for 2009 was 2.78; the rate of sworn officers was 2 per 1,000. The UCR Program computes these rates by taking the number of employees, dividing by the population of agency's jurisdiction, and multiplying by 1,000.
- Female employees accounted for 51.80% of all full-time civilian law enforcement employees in 2009.
- Males accounted for 92.49% of all full-time sworn law enforcement officers in 2009.

## Estimated Agency Crime Totals

If an agency submitted 3 or more months of data, but fewer than 12, the estimation is based on the reports that the agency did submit. The total number of crimes for each category (rape, robbery, etc.) is estimated by multiplying the reported number of crimes in that category by 12/N, where N is the number of months for which reports exist. This formula was not used for homicides, as BCI gathers homicide data from all agencies, regardless of whether or not they submit UCR data.

For agencies that submitted no data at all to BCI, estimated crime rates were based on agencies which are considered to be those in the same population group as the non-submitting agency, and which submitted a full 12 months of data. Thus, if all the fully-submitting agencies in the same population group average N number of rapes per 1,000 population, it was estimated that the non-submitting agency in the same population group also had N number of rapes per 1,000 population. The same process was repeated for robbery, aggravated assault, etc. It was not used for homicides, as BCI gathers homicide data from all agencies, regardless of whether or not they submit UCR data. Estimation was also not calculated on the arson data.

## Introduction – What is Incident Based Reporting?

The National Incident Based Reporting System (NIBRS) is an updated method of collecting crime data within the UCR program. It was designed to provide more comprehensive data for the management of crime in our society. In an incident based reporting (IBR) system, computer technology is used to collect more detailed information about the crimes that occur. The availability of detailed information about criminal activity, stored in a computer data base, makes the analysis of criminal activity a viable tool for law enforcement administrators and other public officials.

The Utah Incident Based Reporting System was implemented in 1991; 64 agencies submitted IBR data for this report. The data accepted by the Utah repository is also forwarded to the NIBRS repository where the FBI uses it to depict criminal activity nationwide.

The data from the IBR system is not directly comparable to the data from the summary based reports. Information about each incident and arrest is collected for 22 offense categories comprised of 46 Group A offenses. All offenses that occur in a criminal episode are reported, not just the most serious. Only arrest data is collected for 11 Group B crimes.

Converting to IBR takes a lot of planning, work, and patience. It also requires enough foresight to see the value of accurate, detailed crime data in understanding and managing this serious problem. BCI appreciates the following agencies which have made the commitment to participate in the NIBRS program:

**CLEARANCE** - incidents may be cleared by arrest or by exceptional means.

*Clearance by Arrest:* The FBI's Uniform Crime Reporting Program states that "an offense is cleared by arrest or solved for crime reporting purposes when at least one person is: 1) arrested, 2) charged with the commission of the offense; and then turned over to the court for prosecution (whether following arrest, court summons, or police notice). Although no physical arrest is made, a clearance when the offender is a person under 18 years of age and is cited to appear in juvenile court or before other juvenile authorities."

*Clearance by Exception:* The FBI's Uniform Crime Reporting Program states that "In certain situations, law enforcement is not able to follow the three outlined steps under 'clearance by arrest' to clear offenses known to them." However, "if the following questions can be answered 'yes,' the offense is considered to be 'Cleared by Exception.'"

1. Has the investigation definitely established the identity of the offender?
2. Is there enough information to support an arrest, charge, and turning over to the court for prosecution?
3. Is the exact location of the offender known so that the subject could be taken into custody now?
4. Is there some reason outside law enforcement control that precludes arresting, charging, and prosecuting the offender?

Some examples of exceptional clearance situations:

- Death of the offender (suicide, killed by law enforcement, murder-suicide situation, natural causes)
- Deathbed confession by offender
- Offender already in custody or serving sentence for another offense
- Extradition denied
- Victim refuses to cooperate in prosecution
