

Director's Message

Our vision at the Weber-Morgan Health Department for our community is: *Healthy Individuals and Families Thriving in a Clean and Safe Community*. The health of the people of Weber and Morgan counties would amaze those who lived 100 years ago in the early 20th century. The leading causes of death then were influenza, pneumonia, diphtheria, tuberculosis, and gastrointestinal infections. The mortality rate was 580 per 100,000 people and the average life expectancy was 47 years old. Today, only 30 people per 100,000 die from these diseases each year. These gains were achieved through improved sanitation, better nutrition, the pasteurization of milk, and the control of infectious diseases with vaccines and antibiotics. Our average life expectancy today is 79.

While there has been much progress in public health over the past 100 years there is still much to do in addressing todays public health challenges. With the decline in the major acute disease rates, the proportion of mortality from major chronic diseases such as heart disease, cancer and stroke increased by more than 25 percent. Cardiovascular disease accounts for about 50 percent of all deaths. Cancers are responsible for another 20 percent and injuries account for a large number of deaths.

With this in mind, we at the Weber-Morgan Health Department along with our community partners have developed programs to address key health and environmental issues that impact our community. I am happy to present our 2018 Annual Report highlighting the efforts of our Board of Health and staff to improve the health of the citizens in our community this past year.

A New Board

As part of the first update to the WMHD Bylaws since 2008, Weber County Commission and Morgan County Council expanded the makeup of the governing body to include representatives of partner agencies and community stakeholders.

The 13-member WMHD Board now includes rotating membership from local hospitals and school districts; local businesses and environmental/sustainability interests; Midtown Community Health Center and Weber Human Services; the Weber Medical Society and Weber State University's school of public health as well as appointees from Weber and Morgan counties, Ogden City and the Weber Area Council of Governments.

IN MEMORIAM: Our cover photo depicts a large American flag hanging over Coldwater Canyon in honor of Maj. Brent Taylor, North Ogden Mayor and WMHD board member who took a leave of absence to deploy to Afghanistan. He was killed in action on Nov. 3.

We're Project Public Health Ready!

Weber-Morgan Health Department is nationally recognized as Project Public Health Ready, a joint proclamation by NACCHO and the CDC.

 The road to PPHR recognition required completion of 289 criterion. This criterion became an integral part of 12 emergency plans, a workforce development plan, a training needs assessment and a comprehensive multi-year training and exercise plan.

Encouraging Clean Air Activities

Year	Total	Failed	Tampered
	Diesel	Diesel	Diesel
	Tests	Vehicles	Vehicles
2017	10,727 (7%)	1,999 (19%)	801 (7.5%)
2018	10,692	1,115	234.2
	(7%)	(10%)	(2%)
Year	Total	Failed	Tampered
	Gasoline	Gasoline	Gasoline
	Tests	Vehicles	Vehicles
2017	142,703	9,485	875
	(93%)	(6%)	(6%)
2018	144,224 (93%)	7223 (5%)	714 (5%)

Vehicle Emission Testing

- The diesel failure rate dropped 47% in the second year.
- Tampered diesels saw a 73% reduction in the second year.

Clear the Air Challenge

- Community Team has doubled the number of participants each year from 200 to 800.
- WMHD Employees finished 3rd in Top Small Team category.

Lawn Mower Exchange

- Weber State Sustainability received a \$25,000 UCAIR grant to hold a Northern Utah event on Earth Day.
- WMHD and DCHD partnered with Weber State to distribute 837 lawn mowers.

Aug. 31: All Hands On Deck

- Bloom visible between August 31 and September 7, 2018.
- WMHD sampled multiple locations and worked with event organizers to provided up-to-date information and Health Advisories for possible participants and the general public.

Teamwork Prevents Rabies

- Teacher discovers children playing with a bat at Gramercy Elementary.
- DWR transports the bat for testing.
- Results are positive. WMHD sends 350 letters home with students with instructions for parents on symptoms.

Up to 50 people in Ogden sick with norovirus after church party

Foodborne Illness Investigation

- WMHD was contacted by a community member who reported dozens of sick people in his congregation.
- EH inspected the caterer and found no issues.
- Epi nurses interviewed individuals and found no additional illness linked to caterer or specific food item. Cause undetermined.

Combating HIV in Our Community

Link patient

- •PrEP provider in the area
- •FREE PrEP clinic
- •Syringe Exchange Program
- •Other services as needed.

Patient Education

- •Identify high risk behaviors
- Risk reduction counseling

HIV Testing

4th Generation Testing:

Detects HIV infections quicker than other rapid testing options by detecting Antigens & Antibodies.

Patient Education

- Reducing risk of transmission
- Risk reduction for contracting other STD's and Hep B/ Hep C

Link Patient

- Medical care to treat
 Infection
- Syringe Exchange Program
- •Other services as needed.

Investigation

- •16 new HIV morbidity cases investigated 2018
- •16 Partners/contacts contacted, offered testing.

HEPATITIS A OUTBREAK

Multiple states across the country have seen outbreaks of hepatitis A, primarily among people who use drugs and people experiencing homelessness.

Throughout 2018, Utah experienced a large hepatitis A outbreak. Between May 2017 and November 2018, over 280 cases were identified.

During that time, WMHD identified nine outbreak-associated cases of Hepatitis A. Here are some activities WMHD did in 2018 to help prevent spread of infection among our high risk populations:

TARGETED POPULATIONS

- Homelessness
- Illicit Drug Use
- Recent Incarceration

NUMBER VACCINATED

- 112 free Hepatitis A containing vaccines given
- In addition, 473 Hepatitis A containing vaccines were given to adults through WMHD's daily immunization clinic

INTERVENTIONS

- Partnered with Hope Clinic to offer hepatitis A vaccinations at Lantern House. Gave out swag bags including hepatitis A education, hand sanitizer, and other helpful items, including a treat.
- Provided free hepatitis A vaccine in our clinic to highrisk populations.
- Worked with Weber County Jail medical staff to vaccinate inmates potentially exposed to confirmed hepatitis A cases.
- Provided education to community partners working with high risk populations, food handlers and general public, and offered vaccine as desired.

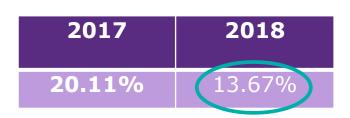

Increasing HPV Vaccine Uptake

Human Papillomavirus is the most common sexually transmitted infection, and a leading cause of cancer. It is recommended for young people between ages 9 and 26 years old. Completing the required series of shots is crucial for prevention.

- Activities to raise rates:
 - HPV vaccine offered at influenza school outreaches this year.
 - Reminder cards sent to those who need subsequent doses for completion.
 - Northern Utah Immunization Coalition (NUIC) activities:
 - Letters were sent encouraging providers in Northern Utah to give HPV vaccine.
 - HPV information was distributed to Northern Utah elementary schools
 - ✓ Since 2017, there has been a 23.5% increase in HPV doses given at the Weber-Morgan Health Department and 27.3% of 2018 HPV doses were given at school clinics.

Reducing WIC Preterm Birth Rates

- Nutrition staff evaluated, educated, and followed up with pregnant women high risk for preterm birth due to:
 - Smoking
 - Alcohol use
 - Drug use
 - Previous preterm births
 - Closely spaced pregnancies

A 6.44% decrease in preterm births among Weber-Morgan WIC Participants in 2018!

Collaborated with Prevent Birth Defects Utah for Participant education and awareness.

Reaching Out to New WIC Participants

- Safe Kids Day
- Homeless Shelters
- Day Care Centers
- OB/Pediatric offices
- Night Out against Crime
- Community Christmas at Ben Lomond High
- Rancho Markets
- Refer-a-Friend diaper campaign
- Many other Community Programs

✓ Weber-Morgan WIC distributed 6,263 flyers this year!

Permitting Tobacco Retailers

- WMHD Board of Health Passed the Tobacco Sales and Permitting Regulation in August 2018.
- Health Promotion Staff organized a "lunch and learn" for city managers on the new permitting process. All cities sent representatives.
- Retailers invited Q&A training at the health department
- Staff sent letters emails and visited the stores in-person.
- Permitted 152 stores
- Audited 42 stores
 - ✓ 22 stores had publicly accessible products which were removed before a permit was granted

Weber-Morgan Health Department

Regulation for

Tobacco Sales and Permitting

Adopted by the Weber-Morgan Board of Health

Under Authority of Section 26A-1-121 Utah Code Annotated, 1953, as amended

Certified Official Copy Weber-Morgan Health Departme

Must be placed in public view

Suicide Prevention: Lethal Means Reduction

- 86% of firearm deaths in Utah are suicides, according to the Utah Suicide Prevention Coalition.
- WMHD partnered with 7 concealed carry instructors to incorporate a suicide prevention module in their training, distributed 2,112 gun locks, and reached approximately 110,615 individuals through the "Is Your Safety On" media campaign.
